Main Duties and Responsibilities:

- Staying up to date with the latest software testing strategies and tools.
- Working within an enjoyable dynamic team.
- Creating automated testing scripts and processes (dependent on experience)
- Creating well-structured test plans and test cases
- Working with a multi-disciplined agile team
- Using a curious and methodical mind set to investigate issues.
- Working closely with cross-functional teams to ensure quality throughout the SDLC

Technologies you'll be using:

- Automated testing tools
- TestRail
- Jira
- Browserstack
- Jenkins
- Confluence

Person Specification:

Work Experience, Knowledge & Skills:

- BSc in Computer Science or related subject
- Proven experience as a Quality Assurance Tester or similar role
- Experience working in an Agile and Waterfall development processes
- Experience working with software development teams
- Knowledge of software QA methodologies, tools and processes

Competencies required for the Role:

- Growth and output mindset
- Excellent communication skills
- Critical attention to detail and high level of accuracy
- Proactive, adaptable and a quick learner
- Focused, conscientious, efficient with excellent time management skills
- Team player
- Trustworthy
- Professional at all times

Other Information

- Permanent full-time role – Monday to Friday 9.00am – 5.30pm
- 3-month probationary period
- Benefits package: 5% Contributory Pension, initial 25 day's holiday, enhanced maternity/paternity policies, life assurance scheme
